

Montana Birding Checklist

compiled by: Robert Schultheis
2015

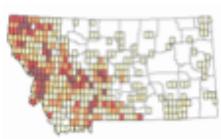

Welcome to your personal Montana Birding Checklist! This checklist contains all of the birds a birder can reasonably expect to find in the state of Montana. Each bird has a place to write when and where you first identified it. The first time a bird species is identified is a special moment for every birder, and the primary purpose of this checklist is to preserve that very personal moment.

- This checklist is intended to be used as a supplement to a North American field guide for Birds. This checklist, by itself, will not help you identify birds. It will help you know if a given bird can be reasonably expected to be seen at a given time of year and location within Montana.
- **Each sub-section is sorted by overall prevalence.** The most common bird is first in the sub-section, the least common bird is last. **However**, prevalence is determined by the number of reported observations according to FWP. Some birds which have been the targets of study have observations counts that are inflated relative to their prevalence. For example the Harlequin Duck is relatively rare, but is the second most observed duck in Montana according to FWP.

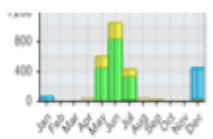

Icons

	Bird overwinters in Montana
	Bird has been observed between Dec 15 - Feb 15, but is not widely considered to overwinter in Montana.
	Direct observations of Bird breeding in Montana
	Indirect evidence of breeding in Montana
	Bird migrates through Montana

Relative Density Maps

	The Maps have been copied directly from the FWP website. Maps are divided into quarter latitude / longitude squares. Completely white squares indicate the species has essentially no presence. The darker the color, the greater the density of the species.
---	---

Phenology Charts

	<p>These charts have been copied directly from the FWP website. They represent when a bird can be expected to be seen in Montana.</p> <ul style="list-style-type: none"> • Green represents normal observations • Yellow represents breeding observations • Blue represents overwintering observations
---	--

Legal Disclaimers

This work is for educational and informational purposes only. Any commercial use, including sale, is strictly forbidden. This is necessary as the maps and charts are taken directly from the FWP website.

More info

This work was "compiled" through a custom web scraping program. The source code, as well as a PDF form of this document can be found at https://github.com/rschultheis/montana_bird_checklist

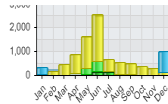

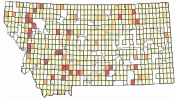

The program was written by Robert Schultheis, mostly as a way to learn about the birds within. The author has no commercial interest in this work or anything related.

The author welcomes questions and comments at his email, robert.schultheis@gmail.com.
